

Focus on Priorities

Responding to COVID-19

More than 1,500 lives have been lost and 300,000 Minnesotans are currently unemployed mostly as a result of the coronavirus (COVID-19). The pandemic has exposed deep flaws in our community structures, especially in our health care and economic systems. As your Minnesota state representative, I would work to:

- Provide COVID-19 testing and personal protective equipment (PPE) for employees;
- Guarantee worker protections and enforcement;
- Implement measures to protect high-risk and older citizens;
- Ensure paid leave for all who get sick or are caring for those who are ill from the coronavirus;
- Provide additional small business grants to cover COVID-induced challenges.

What other solutions would you support to help reopen in a safe and effective manner?
