### **HONORING OUR SENIORS**

The term “senior” covers a four-decade age range, but does not do justice to the varying needs, expectations, and continuing contributions of the many unique individuals it attempts to define. With that uniqueness always at the front of my mind, in representing the needs of these individuals, I will honor:

- Assuring that services support each individual’s choice of housing...the family home, group environment, or assisted facility;
- Working to provide safe and affordable access to health care that reflects the unique health needs of each senior;
- Assuring transportation options;
- Fighting to address issues of accessibility;
- Assuring adequate staffing, supervision, and inspection of living facilities;
- Working with our Congressional delegation to protect the benefits which our seniors have earned: Social Security and Medicare.
